Summary

Software Developer with a Bachelor's degree in Computer Science from Jamhuriya University of Science & Technology. Skilled in full stack development, with a focus on building responsive user interfaces, efficient APIs, and scalable, high performance applications.

Education

Bachelor of Science in Computer Science,

Jamhuriya University of Science and Technology

- Focused on software development, mobile app development, and AI.
- Skilled in Python, Java, JavaScript, TypeScript, Node.js, Express, and React.
- Developed the JUTSA Management System for university administration as part of academic projects.
- Gaining practical experience in problem-solving, collaboration, and research.

Skills

FrontEnd
HTML, CSS, JavaScript, ReactJS, TailwindCSS

Programming Languages
JavaScript, TypeScript, Python

Tools
Git, GitHub, Docker, Postman

Backend
Node.js, Express.js, MongoDB, PostgreSQL, MySQL, Prisma

Frameworks and Libraries
Next.js, React.js, Vite, MERN Stack

Professional Experience

Software Developer, *Jamhuriya University Technology Students Association*
I collaborated with a team to develop a web application that streamlines administrative tasks for the university's faculty and staff. I contributed to system architecture, focusing on usability and scalability, while utilizing JavaScript, Node.js, and React to enhance the platform's performance. I played a key role in problem-solving, testing, and ensuring the delivery of a high-quality, bug-free product.
